- A-level subjects: Computer Science, Mathematics, Further Mathematics, Physics
- Awards: School Computer Science Award (2022, 2020), Christine Lee Jones Prize for Leadership & Initiative (2022), Merlyn Lowther Scholarship Award (2020), Academic Scholarship (2015-2022)
- CEM IBE baseline aptitude assessment score: 99th percentile nationally (2020)

Experience

PRINCIPAL **2023-PRESENT**

King's Labs (King's Business Club)

- Leading a pro-bono student software engineering team to produce industry-standard software for various professional clients. Member of the Executive Committee at King's Business Club, the UK's largest business society.
- Spearheading agile full-stack software development, seeing projects through from initial vision to sprints to deployment.
- Oversaw all business operations, including software engineering, marketing, corporate relations, and business strategy.
- Demonstrated excellent interpersonal skills by fostering an inclusive, productive culture in a team of 9 software engineers, as well as developing valuable client relations through networking.
- Combined creative and analytical abilities to produce impactful multi-platform marketing campaigns, resulting in a 23% increase in engagement over 6 weeks.

RESEARCH ASSISTANT: AUDITING LARGE LANGUAGE MODELS FOR BIAS IN ROBOTIC CONTEXTS **2023-PRESENT**

Responsible Robotics & AI Lab, King's College London

- Utilised interdisciplinary knowledge of ethics in AI to engineer a robust set of prompts probing LLMs for bias in robotic decision-making settings.
- Showcased rapid learning abilities when programming Python and Bash scripts to test LLMs with the aforementioned prompt set, paying special attention to maximizing efficiency and producing results conducive to quantitative analysis.
- Developed comprehensive documentation for the code base, allowing for seamless collaboration with other researchers.
- Promoted from temporary Research Fellow to Research Assistant for commitment and excellent quality of work produced.

COMPUTER SCIENCE TUTOR **2023-PRESENT**

Educate Private

- Recruited by a global education consultancy company to provide computer science tuition with a focus on programming.
- Displayed thorough understanding of programming principles to develop lesson plans and communicate concepts in an accessible manner to the student.

HEAD OF TECHNOLOGY **2021-2022**

Model United Nations Conference (MUNHIGH 22) - Manchester High School for Girls

- Overhauled the conference website's user interface to increase engagement and accessibility, leading to a 19% increase in page views compared to the previous conference year.
- Facilitated the digital management of the 300+ participant conference by evaluating requirements and implementing suitable technological solutions.

CO-MANAGING DIRECTOR **2020-2021**

Ivy & Bramble (Young Enterprise Startup Company)

- Played a pivotal role in the company's attainment of four major trophies in the space of three months, including Company of the Year and winners of YE Dragon's Den in Greater Manchester.
- Personally awarded the Christine Lee Jones Prize for Leadership & Initiative for excellent performance as Co-Managing Director of a company with 20+ employees.

Projects

PORTFOLIO WEBSITE **2023-PRESENT**

rumaisacodes.com

- Static frontend website built using React and TailwindCSS with a focus on responsive design

LEADER OF WINNING HACKATHON TEAM **DEC 2022**

Global Power Hackathon in association with Pareto Economics, EY, and Microsoft Reactor London

- Programmed a working model of a product dashboard and 5G-readiness index using HTML, CSS, and Django in a 12-hour time limit.
- Acted as an effective team leader, analysing the skillsets of five other team members and distributing tasks accordingly to maximise output in a time-pressured environment.

FULL STACK WEB DEVELOPMENT FOR A-LEVEL COURSEWORK (GRADE 96%) **2021-2022**

Manchester High School for Girls

- Front-end: sudoku game web application using HTML, CSS, and JavaScript
- Back-end: backtracking algorithm to solve any valid sudoku puzzle using Django

GUEST SPEAKER: PARALLELS BETWEEN AI AND NEUROSCIENCE **DEC 2021**

Philosophy & Science Society - Manchester High School for Girls, Manchester Grammar School, Withington Girls School

- Delivered an hour-long talk to an audience of 100+ members discussing the parallels between artificial intelligence and neuroscience after conducting extensive research into the topic.
- Speaker with highest audience attendance for the 2021-22 academic year – audience members reported the talk as inspiring, entertaining, and helpful for their understanding of the subject.

Skills

TECHNICAL SKILLS

- Python (Django, Pandas, NumPy, Sphinx, Selenium, HuggingFace, beginner-level machine learning including PyTorch & TensorFlow)
- Web development (HTML, CSS, JavaScript, React, TailwindCSS)
- Java
- SQL
- Basic assembly code (Atmel 8-bit AVR)
- Currently learning C++

WIDER SKILLS

- Graphic design for marketing (Figma, Canva, Procreate)
- WordPress, Wix
- Spoken languages: English, Urdu, Hindi
